Total	454	184	40.5%

Report: If we look at the trend of academic performance of the **General students**; it has been observed that there has been a gradual decrease in the number of pass percentage. Because of the decision of the Government of Assam to provide Free Admission to the college students; the qualifying marks for admission came to a very low level. Besides, most of the students of the college are from weak economic background. So, sometimes, some of them are unable to arrange the required examination fee. Thus, they skip their mid semester examinations because of which their final results appear as withheld.

Report: If we look at the trend of enrolment; it has been observed that there has been a gradual increase in the number. In 2016, we have the highest number of enrolment. It was possible because of the decision of the Assam Government to provide Free Admission to the college students. In 2019, the number got decreased probably because of the introduction of mandatory online mode for admission.

As far as the trend of the drop out students is concerned; it has been observed that until 2015; the number of drop out students is constant. One of the attributing factors behind the drop out is marriage of the girl students during their graduation period and leaving their studies midway. As almost 60% of the college students are girls, therefore, the impact of this practice can be seen in the total drop out percentage. But in 2016, it has been observed a drastic decrease in the number of drop out students. After the execution of the Free Admission scheme; the level of seriousness of the regular students has been observed to be increased. After the worrying two sessions; special measures like remedial classes and follow up sessions have been adopted by the college administration to improve the overall academic environment.
